

# SHANE SCHLEGER

Sydney, NSW • 0415 994 541 • spschleger@gmail.com

## CAREER PROFILE

Underground coal **ventilation operator/supervisor** with 7+ years' experience building and maintaining critical underground infrastructure in high-risk environments. Strong record of **safety leadership (S123/G2)**, team coordination, mobile plant/materials handling, and delivery against shift KPIs. Ready to transition these skills to **chemical injection** for ground stabilisation, water stop and soil improvement on major civil/tunnelling remediation projects across Sydney. Holds **Construction White Card**, Standard 11 and QLD Coal Board Medical; **fit to wear RPE** and committed to Silica Awareness compliance.

## CORE CAPABILITIES

- Underground works (coal) → **ventilation control device (VCD) construction & maintenance**, services, ground controls
- **Safety & compliance:** CMSHA & Regulations, SOPs, risk assessments/JSA, incident response, first aid (HLTAID014), permit to work
- **Team leadership & coordination:** crew planning, resource allocation, quality control, stakeholder comms with ERZ Controllers/Engineers
- **Equipment & site operations:** mobile equipment operation, materials transport, mixing/handling, setting up work fronts, QA documentation
- **Read & apply** engineering specs, drawings, SDS and manufacturer instructions; strong housekeeping and environmental controls
- **Adaptable & teachable:** quickly upskill on **single/dual-component injection pumps**, resins and grouts; disciplined with batch logs & QA

## RELEVANT EXPERIENCE

### Ventilation Operator – Ensham Mine (UG Coal)

Luna Mining | Mar 2025 – Present (contract)

- Construct/maintain VCDs to engineering specs; set out, build, seal, cure and QA check installations.
- Operate mobile equipment; manage transport and supply of materials/equipment to faces and work sites.
- Work to shift plans with a **zero-harm** focus; complete pre-starts, JHAs and close-out reports.

### Ventilation Supervisor – Grasstree & Aquila Mines (UG Coal)

Whisper Mining / Manuplex for Anglo American | 2019 – Jul 2024

- Led ventilation crews delivering critical underground works, prioritising **safety, quality and schedule**.
- Planned labour/equipment to achieve shift targets; coordinated with engineers/ERZ Controllers for approvals and sign-off.
- Ensured all works complied with CMSHA, site SOPs and engineering drawings. Mentored junior operators.

### Ventilation Operator – Grasstree Mine (UG Coal)

Whisper Mining | 2017 – 2018

- Supported VCD construction/maintenance and service crew tasks; materials handling and logistics underground.
- Followed supervisor instructions and engineering standards to deliver planned outcomes.

### Leading Hand / Solid Plasterer – Civil/Building

Various Contractors, Mackay & Brisbane | 2005 – 2017

- Supervised small crews on residential/commercial/industrial sites; delivered works to spec under WHS controls.
- Extensive experience with substrate preparation, coatings, mixing/handling materials and finishing to program.

## TICKETS, MEDICALS & TRAINING

- **Construction White Card** (General Induction)
- **S123 Supervisor** (RII.RIS301D Apply risk; RII.WHS301D Safety & health investigations; RII.COM301D Communicate information)
- **G2 Risk Management** (RII.RIS402D Carry out risk management processes)
- **VCD Fundamentals** (RIIMCU212E Construct & maintain basic ventilation devices; RIIMCU302F Construct & maintain ventilation device)
- **Advanced First Aid** (HLTAID014, HLTAID011, HLTAID010, HLTAID009)
- **Underground Lifting Operations** (RIIUND207E)
- **Work Safely at Heights** (RIIWHS204D)
- **Standard 11** (Surface & Underground) • **QLD Coal Board Medical** • **Silica Awareness**: willing to complete immediately
- **Confined Space & EWP VOCs**: willing to obtain/refresh promptly; fit-tested/RPE compliant (willing to wear/purchase Versaflo)

## WHAT I BRING TO VIRTUS (CHEMICAL INJECTION)

- **Proven underground discipline**: experienced working under permit-to-work, gas testing, ventilation and emergency procedures.
- **Quality builds to spec**: accustomed to tight engineering tolerances, cure times, sealing/finishing and QA sign-offs.
- **Safe pump & materials handling**: strong foundation to quickly master **single/dual-component injection pumps**, resins/grouts and batch logs.
- **Team fit & attitude**: calm under pressure, coachable, reliable; consistent housekeeping and environmental stewardship.
- **Sydney-based & mobile**: available for Metro & surrounds, days/nights and tunnel closures.

## REFEREES

- **Tim Howard** – ERZ Controller, Ensham Mine | 0447 228 538
- **Mark Vucas** – Project Manager, Manuplex (Aquila Mine) | 0412 187 967
- **Lachlan Robins** – Former Project Manager, Manuplex/Whisper Mining | 0455 662 861
- **Eddie Algie** – Former Project Manager, Whisper Mining (Grasstree) | 0447 765 788
