Dear Telum Hiring Manager,

I would like to express my interest in your Tunnel Shotcreters/Remedial Workers roles as advertised on Seek. With my experience I am a perfect candidate for your company.

I have eight years experience in Underground Coal Mining, with five years as a Supervisor leading crews. The entirety of my underground coal experience has been in Ventilation - which entails underground construction to engineered specification with a heavy use of dry shotcrete/gunite. I have extensive experience with picolla style pumps and a variety of dry shotcrete products.

The remainder of my working career has been in construction as a Solid Plasterer/Renderer so I am skilled in hand troweling and patching a range of substrates.

I have a strong safety focus and am very proud of my record of having zero personal incidents in my career and zero incidents on my crews while supervising.

I have strong written and verbal communication skills, computer literacy and adherence to procedure and have extensive experience managing manning and economic, profitable delivery of company products and services.

Thank you for considering my application and I look forward to speaking with you about how I can contribute to your operations.

Regards,

Shane Schleger.
